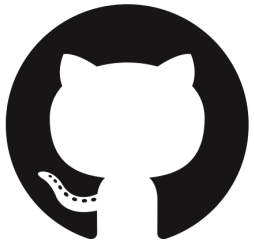
# Student Results Management System

**Group 16 - Team members:**

Dharmarathna N.S. E/18/077
Mihiranga G.D.R. E/18/224
Mudalige D.H. E/18/227

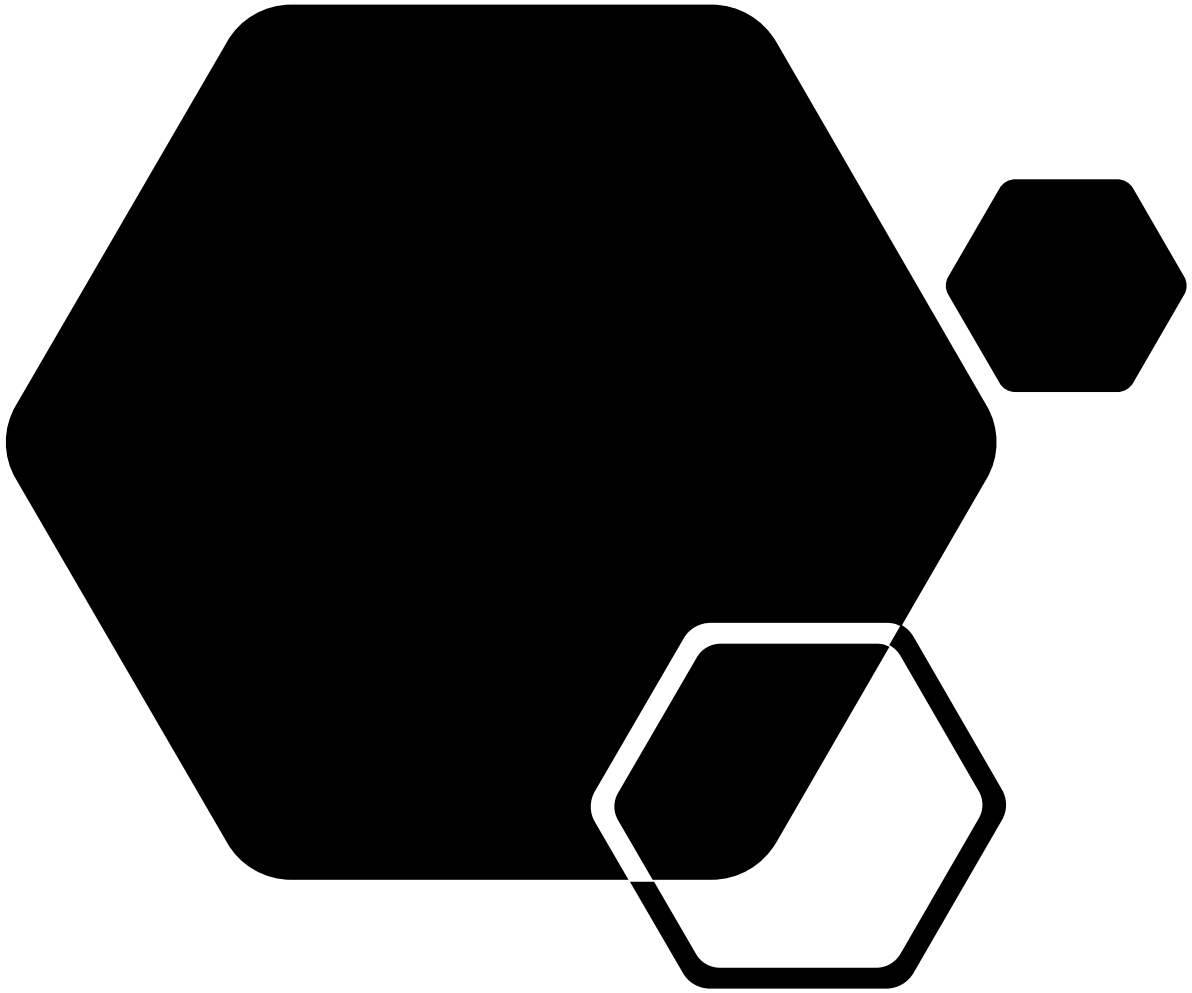
# Introduction

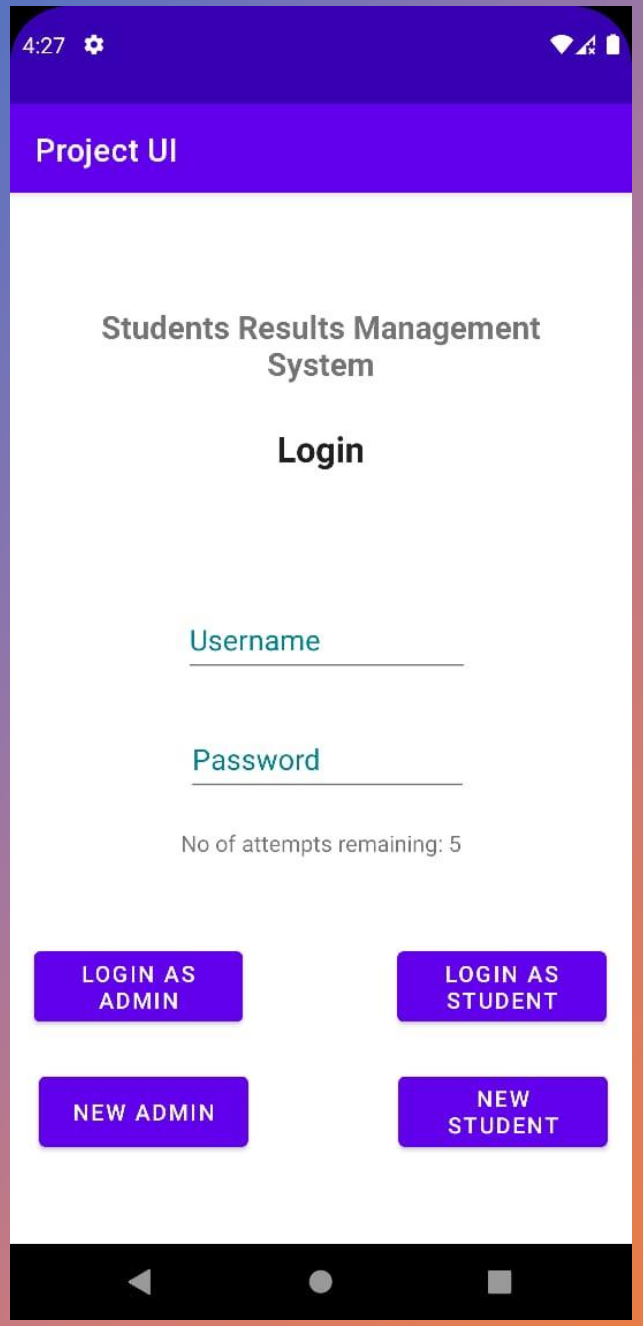
- The aim of this project is to build a mobile application to manage and analyze undergraduate students' marks.



# Technology Stack

# User Flows





# Login Panel

If an Admin already has an account

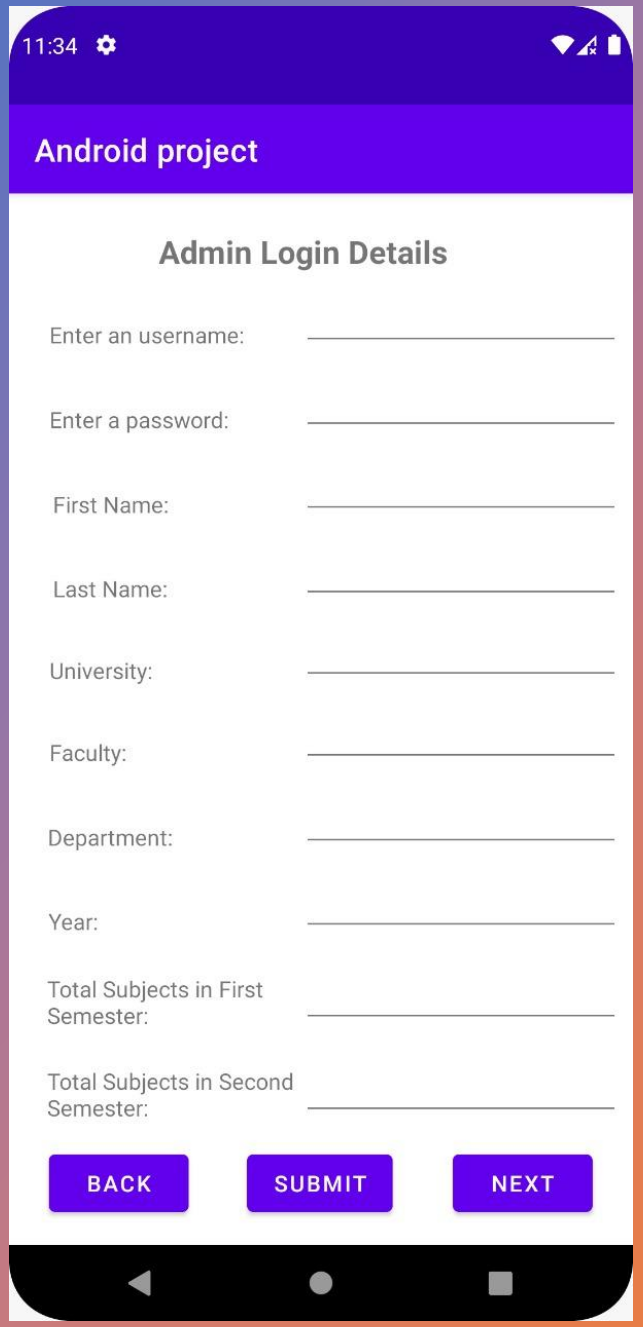
- Enter Username, Password and click LOGIN AS ADMIN button. This will direct to the course registration page.

If a Student already has an account

- Enter Username, Password and click LOGIN AS STUDENT button. This will direct to the page for enter grades.

If Admin or Student doesn't have an account

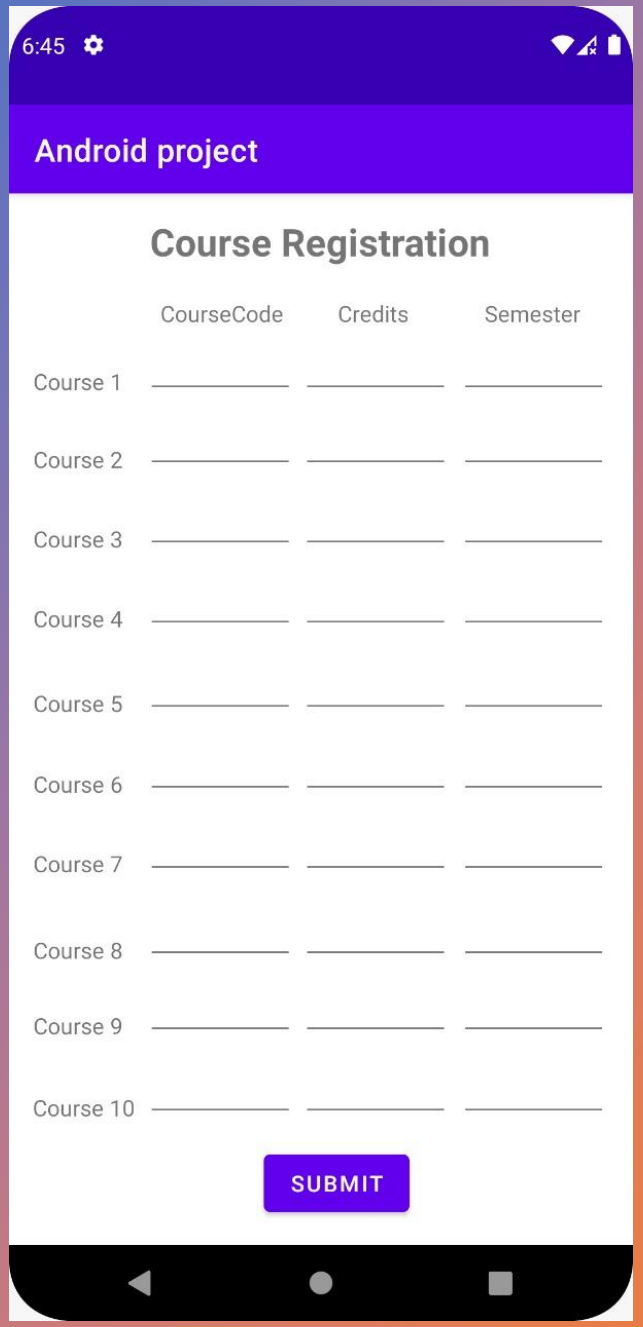
- Admin can click NEW ADMIN button and direct to admin registration page.
- Student can click NEW STUDENT button and direct to student registration page.



# Admin Registration Page

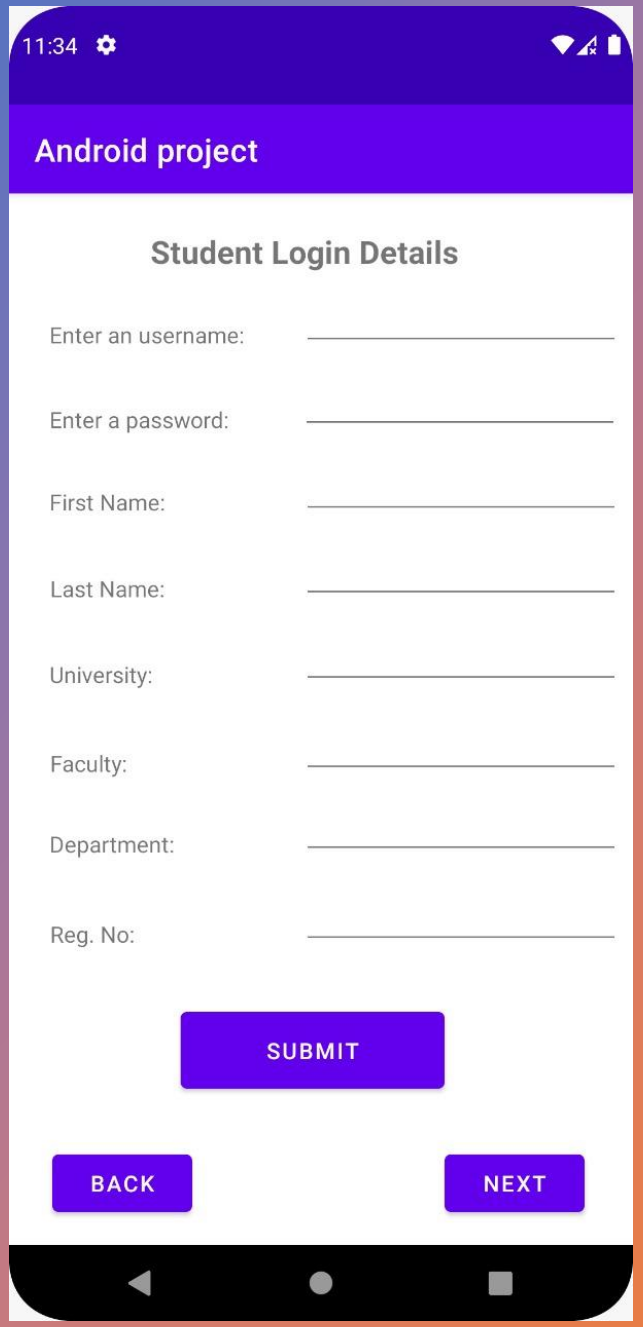
- From this page a new Admin can enter his details and click SUMBIT button to register to the application

- By clicking next button Admin can direct to course registration page



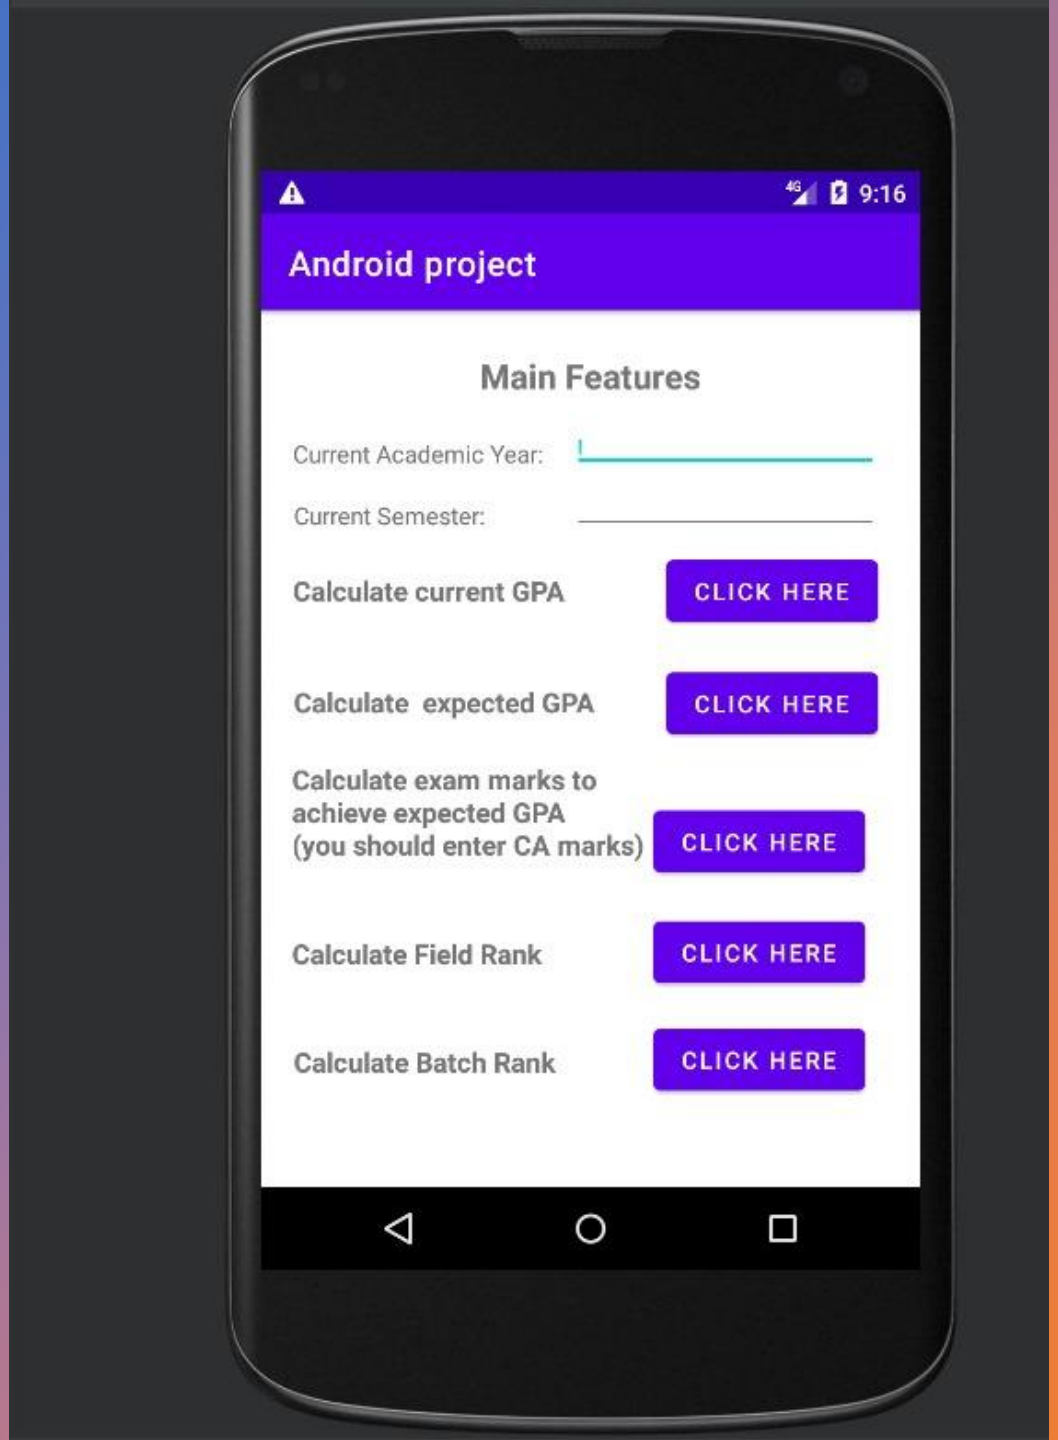
# Course Registration Page

From this page an Admin can enter course details and register courses to the application.



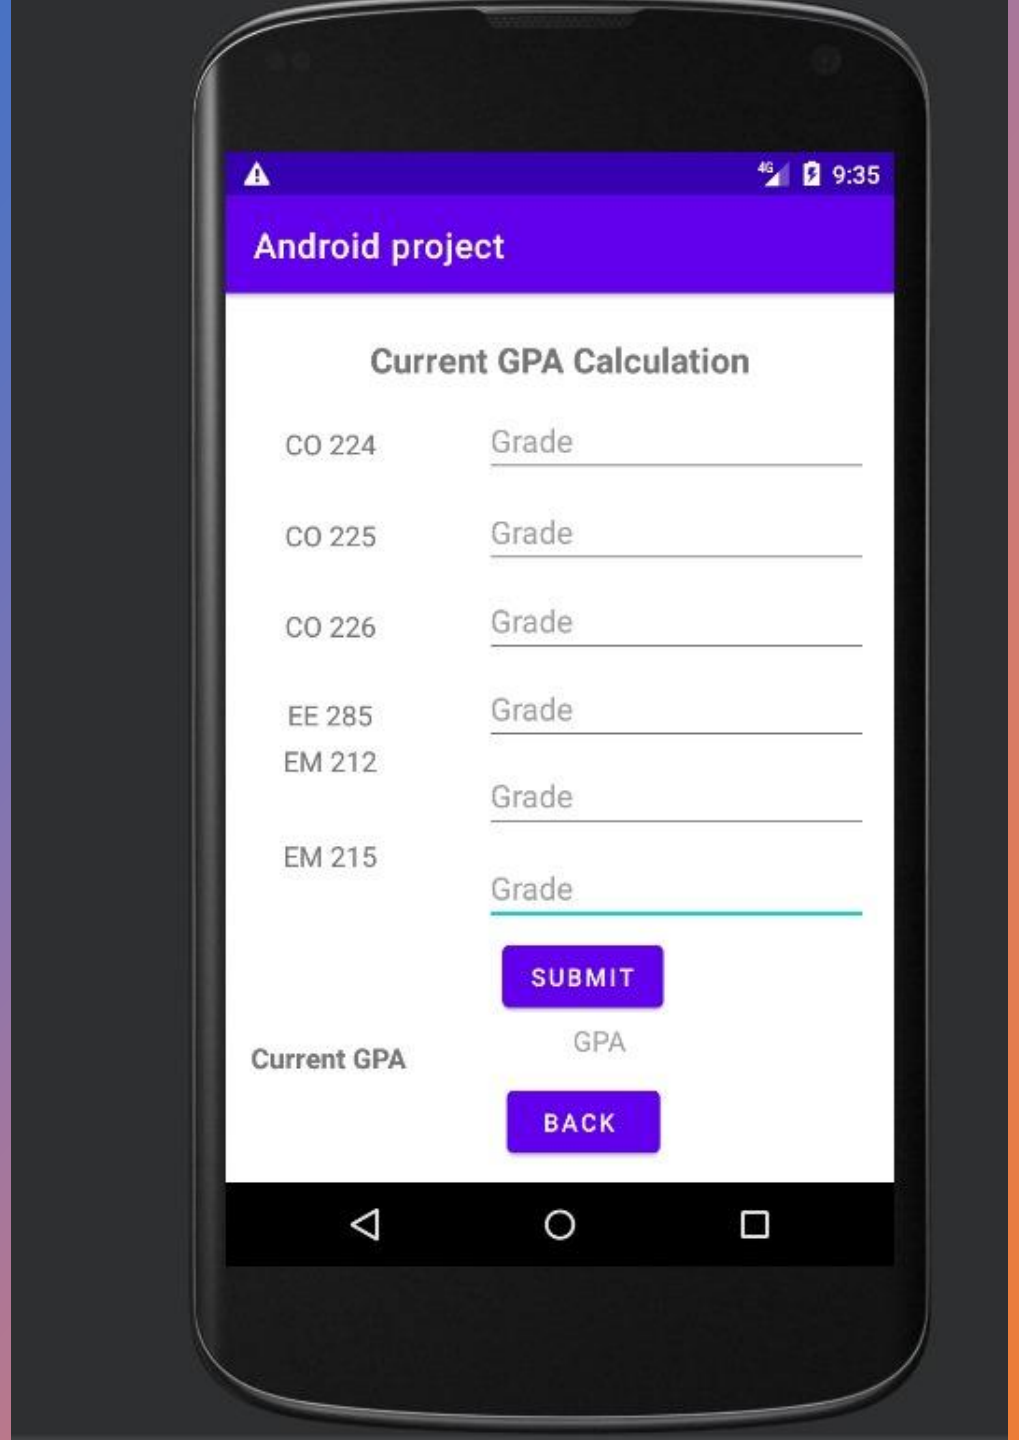
# Student Registration Page

- From this page a new Student can enter his details and register to the application.
- By clicking next button Student can direct to the main features page.



# Main Features Page

- This page contains the main features of our application.
- By clicking relevant button Student can direct to the page of required service.



# Current GPA Calculation Page

- From this page a Student can enter his grades and calculate his current GPA

# Demonstration
